Swiss Cyber Storm 2027

Who are we?

Swiss Cyber Storm is the organizer of the annual Swiss Cyber Storm security conference in Bern and the organizer of the Swiss Hacking Challenge. We are a non-profit association with an organizing committee that works on a voluntary basis.

We offer two conference partnership packages that enable companies to achieve high profile brand and product exposure. The audience of the conference consists of approximately 50% techies and 50% middle- and C-level management.

The Conference

The Swiss Cyber Storm conference is an all-in-one multi-track conference and networking event with top speakers from around the world. It brings together decision-makers, security professionals, and young talents. The center and pivotal point of the event is the networking area with the sponsor's booths, food & beverage and a bar. This is also the place where the after-conference flying dinner will be served and lively discussions and information sharing can continue late into the evening.

Conference Partnership

Business Partner

In addition to a prominent exhibition space in our networking area, this package includes a high-quality online and social media presence and special ticketing benefits. Additionally, a limited number of a 30’ talk slot can be booked in our popular and highly frequented partner track. Show the participants how YOU can help them solve their security challenges.

Conference Bag Partner

Contribute a high-quality giveaway to the conference bag and gain access to more than 450 participants.
